Projects

● Freelance Development

Globe4education

As a freelance web developer, I collaborated with Globe4education to create a dynamic and functional website that aligned with their business goals and brand identity. Through this project, I showcased my ability to deliver tailored web solutions that meet clients' unique requirements while maintaining a strong focus on user experience and design.

features and functionality :
Responsiveness: implemented a responsive web design, ensuring a seamless user experience across various devices and screen sizes.
Contact Form: Developed and implemented an interactive and user-friendly contact form, improving user engagement and facilitating communication.
Analytics and Reporting: Integrated analytics tools (e.g., Google Analytics) to track and analyze user behavior, enabling data-driven decision-making.
SEO Optimization: Implemented on-page and off-page SEO strategies to improve search engine rankings and increase organic traffic.

● Ecommerce Website

PosterPlix

Developed an e-commerce website dedicated to selling posters and frames. This website will offer a wide range of posters, including inspirational quotes, tv shows, sports, and more. Users will have the opportunity to browse, select, and purchase posters that resonate with their personal tastes and preferences.

features and functionality :
Shopping Cart and Checkout: Enable users to add posters to their cart and complete secure transactions.
Payment Gateway Integration: Integrate popular payment gateways (Stripe) for secure online payments.
Responsive Design: Ensure the website is responsive and accessible on various devices, including smartphones and tablets.

● Newsapp

Newsmonk

For this personal project, I designed and developed a modern news application using React and API , combining my passion for technology with a keen interest in staying informed. The NewsApp project showcased my ability to create dynamic and user-friendly web applications that deliver real-time news updates to users in an engaging and intuitive manner.

Certifications

J.P. Morgan Software Engineering Virtual Experience - January 2024

- Set up a local dev environment by downloading the necessary files, tools and dependencies.
- Fixed broken files in the repository to make web application output correctly.
- Used JPMorgan Chase's open source library called Perspective to generate a live graph that displays a data feed in a clear and visually appealing way for traders to monitor.
